

MOVING FROM QUALIFICATIONS TO COMPETENCE

The three knowledge domains:

- **The affective domain (Kratwohl)**
Personal qualifications: attitudes, feelings, values...
- **The cognitive domain (Bloom)**
General qualifications: knowledge, analysis, synthesis,...
- **The psychomotoric domain (Dave):**
Job-specific qualifications: manual skills

A tacit interaction between the three knowledge domains provides competence in specific and new contexts.
Without this tacit interaction you may well have qualifications but may not yet be competent.
